D-4384

2024-28

Time : 3 Hours

Maximum Marks : 70

Candidates are required to give their answers in their own words as far as practicable.

The figures in the margin indicate full marks.

Answer from all the Parts as directed.

PART – A

(Compulsory)

1. Choose the correct answer from the given options: 2×10=20

(a) The multi-layered, hygroscopic tissue found on the outer surface of epiphytic roots that absorb moisture from the atmosphere is known as :

(i) Velamen

(ii) Endodermis

(iii) Exodermis

(iv) Root cap

(b) Regular mechanical tissue and Vascular elements are highly reduced or completely absent in :

(i) Mangroves

(ii) Free-floating hydrophytes

(iii) Desert succulents

(iv) Lithophytes

(c) Respiratory roots or Pneumatophores for gaseous exchange are characteristic of :

(i) Epiphytes

(ii) Halophytes

(iii) Submerged Hydrophytes

(iv) Mesophytes

(d) Which component of xylem is living at functional maturity ?

(i) Tracheids

(ii) Vessels

(iii) Xylem fibers

(iv) Xylem parenchyma

(e) In a monocotyledonous plant the single large cotyledon is called :

(i) Coleoptile

(ii) Coleorhiza

(iii) Scutellum

(iv) Aleurone layer

(f) What type of placenta do ovules attach to a false septum called a replum ?

(i) Marginal
(ii) Axile
(iii) Parietal
(iv) Free-central

(g) An aggregate fruit, where individual free carpels form small drupes is called :

(i) Etaerio of achenes
(ii) Etaerio of drupes
(iii) Etaerio of follicles
(iv) Sorosis

(h) Multiple Fruit Syconus develops from :

(i) Hypanthodium inflorescence
(ii) Catkin inflorescence
(iii) Verticillaster inflorescence
(iv) Corymb inflorescence

(i) Wheel-like or spoke-like structures are formed by anomalous medullary rays in secondary xylem of :

(i) Dracaena
(ii) Tinospora
(iii) Boerhaavia
(iv) None

(j) Which of the following is not a nut (Dry fruit) :

(i) Groundnut
(ii) Litchi
(iii) Chestnut
(iv) Hazelnut

PART – B

(Short Answer Type Questions)

2. Write short note on any Four of following : 4×5=20

(a) Verticillaster Inflorescence

(b) Fleshy Fruits

(c) Xylem

(d) Periderm

(e) Tinospora

(f) Placentation and its types

PART – C

(Long Answer Type Question)

3. Answer any three questions of the following : 3×10=30

(a) Define fruit and discuss different types of simple fruit.

(b) Explain the anomalous secondary growth in Dracaena.

(c) Describe Organization of tissue in relation to environment in Halophytes.

(d) Define meristem. Discuss characteristics of meristematic cells and types of meristematic tissue on the basis of origin and position.

(e) Define seed and discuss structure of a monocot seed.
